**Past performance cannot guarantee future results.** Investing involves risk, including the possible loss of principal and fluctuation of value. Returns greater than one year are annualized. Returns are expressed in U.S. dollars. Composite returns are net of transaction costs and gross of non-reclaimable withholding taxes, if any, and reflect the reinvestment of dividends and other earnings.

Gross-of-fees returns are presented before management and custodial fees but after all trading expenses. Net-of-fees returns are calculated by deducting 1/12 of the highest tier of the standard

fee schedule in effect for the period noted (the model fee). The composite model fee for each period is either the highest tier of the current fee schedule or a higher value, whichever is required to ensure the model composite net-of-fee return is lower than or equal to the composite net-of-fee return calculated using actual fees. Actual fees may vary depending on, among other things, the applicable fee schedule and portfolio size. The firm's fees are available on request and may be found on Part II of its Form ADV.

\*Since Inception returns are relative to the strategy's inception date of 06/30/1993.

<\$1B	1.2	0.0

The RS Mid Cap Value Composite invests principally in equity securities of companies that RS Investments believes are undervalued, and may at times invest a portion of its assets in non-U.S. securities. The benchmark is the Russell Midcap Value Index. The composite was created in January 2003.

The Russell Microcap® Value Index measures the performance of the microcap value segment of the U.S. equity market. It includes Russell Microcap companies that are considered more value oriented relative to the overall market as defined by Russell's leading style methodology. The Russell Microcap Value Index is constructed to provide a comprehensive and unbiased barometer for the microcap value segment of the market. The Index is completely reconstituted annually to ensure larger stocks do not distort performance and characteristics of the microcap opportunity set.

Index returns are provided to represent the investment environment during the periods shown. The index is fully invested, including the reinvestment of dividends and capital gains. Index returns do not include transaction costs, management fees or other costs. Non-US indices are net of withholding taxes, if any.

Risk Statistics source: Zephyr StyleADVISOR. Characteristics, Top Ten Holdings and Sector Diversification source: FactSet Research Systems, Inc. The top ten holdings and sector diversification are presented to illustrate examples of the portfolio's investments and may not be representative of the portfolio's current or future investments.

Holdings are as of quarter end and may change at any time. This material should not be construed as a recommendation to buy or sell any security.

Information relating to portfolio holdings is based on the representative account in the composite and may vary for other accounts in the strategy due to asset size, client guidelines and other factors. The representative account is believed to most closely reflect the current portfolio management style.
