- The Sophus Emerging Markets Small Cap Composite includes all discretionary accounts invested in the Emerging Markets Small Cap Strategy. The Strategy employs an integrated investment approach whereby proprietary quantitative screens are melded with deep fundamental analysis to capture the growth of small-capitalization companies in emerging markets countries. The composite creation date is March 2014, and the composite inception date is February 2014.
- The benchmark of the composite is the MSCI Emerging Markets Small Cap Index (Net). The MSCI Emerging Markets Small Cap Index (Net) is a free float-adjusted market capitalization index that is designed to measure the equity performance of small-capitalization companies in emerging markets countries. The benchmark returns are provided to represent the investment environment existing during the time periods shown and are not covered by the report of independent verifiers. For comparison purposes, the index is fully invested, which includes the reinvestment of income. The returns have been taken from a published source and do not include any transaction fees, management fees, or other costs.
- The internal dispersion of annual returns is measured by the standard deviation of asset-weighted gross returns of accounts included in the composite for the full year. If less than six portfolios are included in the composite for the full year, no dispersion measure is presented, as it is not considered meaningful (N/M). The three-year annualized ex-post standard deviation measures the variability of the composite's gross returns, and the benchmark returns over the preceding 36-month period. It is not required to be presented for annual when a full three years of composite performance is not yet available.

6. Composite and benchmark returns are presented net of non-reclaimable withholding taxes. Gross-of-fees returns are presented before management and custodial fees but after all trading expenses. Net-of-fees returns are calculated by deducting 1/12 of the highest tier of the standard fee schedule in effect for the period noted (the model fee). Net returns prior to 1/1/2017 were calculated using actual fees. The composite model fee for each period is either the highest tier of the current fee schedule or a higher value, whichever is required to ensure the model composite net-of-fee return is lower than or equal to the composite net-of-fee return calculated using actual fees. Actual fees may vary depending on, among other things, the applicable fee schedule and portfolio size. The complete fee schedule for this product is:

Market Value	Annual Fee
First \$25,000,000	1.00% (Min. Annual Fee: \$100,000)
Next \$25,000,000	0.95%
Next \$50,000,000	0.90%
Next \$100,000,000	0.85%
Above \$200,000,000	Negotiable
