USAA HIGH INCOME FUND

MEMBER SHARES

Q1 // MARCH 31, 2021

FUND FACTS

Class	Inception Date	Ticker	Expense Ratio:	
			Gross	Net
Fund	08/02/99	USHYX	0.84%	0.84%

Net expense ratio reflects the contractual waiver and/or reimbursement of management fees through November 30, 2021.

Investment Style

High Yield Bond

Investment Objective and Strategy

The Fund seeks to provide an attractive total return primarily through high current income and secondarily through capital appreciation. The Fund primarily invests in U.S. dollar-denominated, high-yield securities, including bonds, convertible securities, leveraged loans, and preferred stocks, with an emphasis on non-investment grade debt securities. Although the Fund will invest primarily in U.S. securities, it may invest without limit in dollar-denominated foreign securities and to a limited extent in non-dollar-denominated foreign securities, including in each case emerging markets securities. The Fund may also invest in certain derivatives, such as futures and options.

About the Fund

- Offers diversification because high-yield has characteristics of both stocks and bonds.
- Less sensitive to changes in interest rates than traditional bonds.
- Long-term returns historically fall between stocks and higher quality bonds.

Portfolio Managers

Julianne Bass, CFA. Since 2007.

Kurt Daum, J.D. Since 2016.

John Spear, CFA. Since 2016.

Jim Jackson, CFA. Since 2019.

Neal Graves, CFA, CPA. Since 2019.

MORNINGSTAR RATINGS AND RANKINGS

	Overall	3 Year	5 Year	10 Year
Morningstar Rating	★★★	★★	★★★	★★★
Morningstar Ranking (%)	—	71	36	48
# of Funds	630	630	556	358

Morningstar Category: High Yield Bond. Morningstar ratings and rankings are based on the Fund share class.

The Morningstar Rating™ for funds, or “star rating,” is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product’s monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The Morningstar Rating does not include any adjustment for sales loads. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable)

Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. The Morningstar percentile ranking is based on a fund’s average annual total return (excluding sales charges) relative to all funds in the same category. The highest (most favorable) percentile rank is 1%, and the lowest (least favorable) percentile rank is 100%. Fund performance used for the rankings reflects certain fee waivers, without which, Morningstar rankings would have been lower and Morningstar ratings may have been lower.

Past performance does not guarantee future results. The performance quoted represents past performance and current performance may be lower or higher. The investment return and principal value will fluctuate so that an investor’s shares, when redeemed, may be worth more or less than the original cost. To obtain performance information current to the most recent month-end, visit www.vcm.com. Returns include reinvestment of dividends and capital gains. Performance for periods greater than one year is annualized. Fee waivers and/or expense reimbursements were in place for some or all periods shown, without which, fund performance would have been lower.

Credit Quality (% Fund)

Top 5 Sectors (% Fund)

Carefully consider a fund's investment objectives, risks, charges and expenses before investing. To obtain a prospectus or summary prospectus containing this and other important information, visit www.vcm.com/prospectus. Read it carefully before investing.

Not all share classes are available to all investors.

All investing involves risk, including the potential loss of principal. Fixed income securities are subject to interest rate, inflation, credit and default risk. The bond market is volatile. Bonds and bond funds will decrease in value as interest rates rise and vice versa. Credit risk refers to the possibility that debt issuers may not be able to make principal and interest payments or may have their debt downgraded by ratings agencies. The value of your investment is also subject to geopolitical risks such as wars, terrorism, environmental disasters, and public health crises; the risk of technology malfunctions or disruptions; and the responses to such events by governments and/or individual companies.

Credit Quality ratings are obtained using Bloomberg Barclays methodology using ratings derived from Moody's Investors Service (Moody's), Standard & Poor's (S&P) and Fitch Ratings (Fitch). When ratings from all three agencies are available, the median ratings is used. When ratings are available from two of the agencies, the lower rating is used. When one rating is available, that rating is used. Victory Capital Management does not evaluate these ratings but simply assigns the to the appropriate credit quality category as determined by the rating agency. **Average Effective Duration** is a duration calculation for bonds that have embedded options. This measure of duration takes into account the fact that expected cash flows will fluctuate as interest rates change and is, therefore, a measure of risk. **Subsidized Yield** reflects fee waivers/reimbursements/limits in effect. **Unsubsidized**

Yield does not reflect any fee waivers/reimbursements/limits in effect.

The Bloomberg Barclays U.S. High Yield 2% Issuer Capped Bond Index (BBgBarc US High Yield 2% I C) seeks to measure fixed rate, non-investment grade debt securities that are dollar denominated and nonconvertible. The index limits the maximum exposure to any one issuer to 2%.
