

FUND FACTS

Class	Inception Date	Ticker	Expense Ratio:	
			Gross	Net
Fund	10/27/00	USMIX	0.36%	0.36%

Net expense ratio reflects the contractual waiver and/or reimbursement of management fees through August 31, 2025.

Investment Style

Mid-Cap Blend

Investment Objective and Strategy

The Fund seeks to match the performance, before fees and expenses, the performance of all small- and mid-cap stocks as measured by the Victory Extended Market Index. The Index is a market cap-weighted index consisting of small- and mid-cap companies in the U.S. equity market. The Index consists of the securities within the VettaFi US Equity 3000 IndexSM after eliminating the largest 500 companies. Under normal market conditions, the Fund will invest at least 80% of its assets in securities or other financial instruments, including derivatives, of companies that are components of, or have economic characteristics similar to, the securities included in the Index.

About the Fund

- Growth potential of U.S. companies.
- Lower costs; index funds have fewer expenses than actively managed equity funds.
- Complements the S&P 500 Index Fund.

Portfolio Managers

Mannik Dhillon, CFA, CAIA. Since 2019.

PERFORMANCE

Average Annual Total Returns (%)

As of March 31, 2025	Q1 2025	YTD	1 Year	3 Year	5 Year	10 Year	Since Inception

Past performance does not guarantee future results. The performance quoted represents past performance and current performance may be lower or higher. The investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than the original cost. To obtain performance information current to the most recent month-end, visit www.vcm.com. Returns include reinvestment of dividends and capital gains. Performance for periods greater than one year is annualized. Fee waivers and/or expense reimbursements were in place for some or all periods shown, without which, fund performance would have been lower. High, double-digit returns are highly unusual and cannot be sustained. Investors should be aware that these returns were primarily achieved during favorable market conditions.

Growth of a Hypothetical \$10,000 Investment Fund Shares (3/31/2015–3/31/2025)

MORNINGSTAR RATINGS AND RANKINGS

	Overall	3 Year	5 Year	10 Year
Morningstar Rating	★★★	★★	★★	★★★
Morningstar Ranking (%)	—	82	59	54
# of Funds	379	379	349	241

Morningstar Category: Mid-Cap Blend. Morningstar ratings and rankings are based on the Fund share class.

The Morningstar Rating™ for funds, or “star rating,” is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The Morningstar Rating does not include any adjustment for sales loads. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable)

Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. The Morningstar percentile ranking is based on a fund's average annual total return (excluding sales charges) relative to all funds in the same category. The highest (most favorable) percentile rank is 1%, and the lowest (least favorable) percentile rank is 100%. Fund performance used for the rankings reflects certain fee waivers, without which, Morningstar rankings would have been lower and Morningstar ratings may have been lower.

Carefully consider a fund's investment objectives, risks, charges and expenses before investing. To obtain a prospectus or summary prospectus containing this and other important information, visit www.vcm.com/prospectus. Read it carefully before investing.

Not all share classes are available to all investors.

All investing involves risk, including the potential loss of principal. Investments in small- and mid-cap companies typically exhibit higher volatility. Index Funds invest in securities included in, or representative of securities included in, the Index, regardless of their investment merits. The performance of the Fund may diverge from that of the Index. Derivatives may not work as intended and may result in losses. The value of your investment is also subject to geopolitical risks such as wars, terrorism, environmental disasters, and public health crises; the risk of technology malfunctions or disruptions; and the responses to such events by governments and/or individual companies.

Active Share is a measure that compares the proportion of security holdings within the product against those of the respective benchmark. The value represents the percentage difference between fund and benchmark.

Market Capitalization is the total dollar value of all outstanding shares computed as number of shares times current market price. **Alpha** is the excess return of a fund relative to the return of a benchmark index. **Beta** is a measure of the volatility, or systematic risk, of a security or portfolio relative to the market or a benchmark. **R-squared** is a statistical measure that represents the percentage of a fund's or security's movements that can be explained by movements in a benchmark index. **Standard Deviation** measures an investment's historical volatility, calculated using the investment's annual rate of return. **Portfolio Turnover Ratio – LTM**

measures trading activity in a portfolio for the past year, indicating how often investments are bought and sold. **Average Price/Earnings (P/E) Ratio** is the current share price of a stock divided by its earnings per share.

The Wilshire 4500 Completion Index is a market-capitalization-weighted index consisting of small- and mid-cap companies in the U.S. equity market. The Index consists of securities within the Wilshire 5000 Total Market Index after eliminating the companies included in the S&P 500® Index. **The Dow Jones U.S. Completion Total Stock Market Index** is a subset of the Dow Jones U.S. Total Stock Market Index that excludes components of the S&P 500 Index. The Dow Jones U.S. Total Stock Market Index is an all-inclusive measure composed of all U.S. equity securities with readily available prices.
