### Investment Style

Large Value

### Investment Objective

Long-term capital appreciation

### Investment Strategy

The Fund invests in securities that the RS Value Team believes are undervalued, with at least 80% of its net assets in large-cap companies. The Fund's investment team considers a company to be large cap if its market cap is between \$5B and the market cap of the largest company included in the Russell 1000<sup>®</sup> Index on the last day of the most recent quarter. The Fund may invest in securities of issuers located globally, and may invest any portion of its assets outside of the U.S. The Fund's investment team currently expects that the Fund typically will hold 35-50 securities positions. The Fund's investment team conducts fundamental research to identify companies with improving returns on invested capital.

### Investment Team

The RS Value team searches for good businesses led by strong management teams, and invests when a stock's price reflects an attractive valuation. We believe this approach will result in superior long-term risk-adjusted returns.
