## FUND FACTS

### Investment Style

Diversified Emerging Markets

### Investment Objective

The Victory Trivalent Emerging Markets Small-Cap Fund's management team seeks to provide long-term growth of capital in the Fund by investing primarily in equity securities of smaller companies in emerging markets countries represented in the MSCI Emerging Markets Small Cap Index. In selecting investments for the Fund, the management team utilizes structured fundamental analysis, which is a combination of quantitative and traditional qualitative analysis, to identify high-quality companies exhibiting improving business momentum and attractive valuations. The stock selection process is designed to produce a diversified portfolio that, relative to the MSCI Emerging Markets Small Cap Index, tends to have a below-average price-to-earnings ratio and an above-average earnings growth trend.

### Investment Strategy

The management team's investment approach is designed to achieve consistent long-term returns across the full breadth of market conditions and economic cycles. The focus of the Fund's investment process centers on security selection within a risk-aware framework. The team believes this is the best way to position the Fund to achieve an optimal balance between potential reward and investment risk over a complete market cycle.

### Investment Team

Trivalent Investments has been dedicated to international equity investing since 1998 and employs an investment process that combines a quantitative framework with fundamental analysis to seek to drive excess returns over time. The team, led by Chief Investment Officer Dan LeVan, has been working together for over 20 years and brings unique level of expertise, specialization and team history to this asset class.

**All investing involves risk, including potential loss of principal. There is no guarantee that the Fund will achieve its objective.** International investing involves special risks, which include changes in currency rates, foreign taxation, differences in auditing standards and securities regulations, political uncertainty, and greater volatility. Emerging markets involve heightened risks related to the same factors as well as increased volatility and lower trading volume. Investments in small and mid-size companies can involve risks such as less publicly available information, higher volatility, and less liquidity than larger companies.

Not all share classes are available to all investors. Please read the prospectus for details.

Estimated EPS Growth and P/E Ratios are based on information obtained from a third party that is believed to be reliable. Estimates are inherently limited and should not be relied upon as an indicator of future results.

**Active Share** is a measure that compares the proportion of security holdings within the product against those of the respective benchmark. The value represents the percentage difference between fund and benchmark. **Alpha** is the excess return of a fund relative to the return of a benchmark index.

### Sector Allocation %

### Region Allocation %

**Beta** is a measure of the volatility, or systematic risk, of a security or portfolio relative to the market or a benchmark. **R-squared** is a statistical measure that represents the percentage of a fund's or security's movements that can be explained by movements in a benchmark index. **Standard deviation** is a statistical measurement of an investment's historical volatility. It is applied to the investment's annual rate of return. **Price-to-earnings ratio (P/E ratio)** is a ratio for valuing a company that measures its current share price relative to its per-share earnings. It represents the multiple of earnings at which a stock sells. **Turnover - Last 12 Months (LTM)** is a measure of trading activity in a mutual fund portfolio of investments for the past year that indicates how often investments are bought and sold.

The **MSCI Emerging Markets Small Cap Index** is a free float-adjusted, market capitalization-weighted index that measures the performance of small-cap stocks in 23 emerging markets. A Fund's portfolio differs significantly from the securities held in an index. An index is unmanaged and not available for direct investment.
